

CASE STUDY

AET is Elevating Smart Spaces with its Aesthetically Appealing & High-Tech LED Displays

AET, a leading LED display screen manufacturer, successfully installed its cutting-edge displays in the office conference room of Demuk Co., Ltd., a prominent smart display solution provider in Bangkok, Thailand.

PRODUCT INFORMATION

- ▶ AET's NX COB P1.25mm displays were strategically installed in a 14.58m² area.
- ▶ AET's NX COB P1.25mm displays feature 72 cabinets with Common Anode configuration.

CHALLENGES

The challenges that our team faced includes the need for a high-resolution display that seamlessly integrated with Demuk's smart solutions, providing a visually immersive experience in a confined space.

REQUIREMENTS

Demuk Co., Ltd. required a premium display solution to elevate their conference room aesthetics while ensuring optimal functionality for their smart display solutions.

QUOTE

“ This successful collaboration showcases AET's commitment to delivering state-of-the-art solutions tailored to our clients' needs. The NX COB Series displays exemplify our dedication to excellence in the LED display industry. ”

- MR. SU PIOW KO, VICE PRESIDENT, AET DISPLAYS

SOLUTION

AET's NX COB P1.25mm displays addressed the challenges by offering unparalleled resolution and adaptability.

RESULT

- The installation resulted in an aesthetically pleasing and technologically advanced conference room.
- The NX COB P1.25mm displays enhanced visual clarity, contributing to a more engaging and impactful smart display experience.

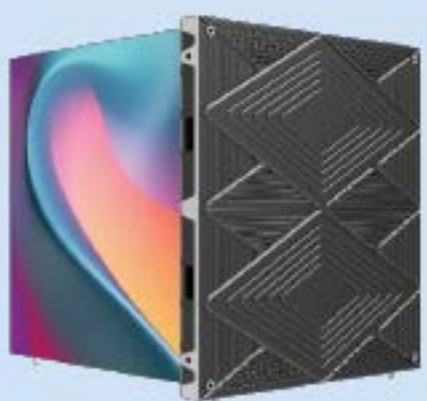

Product Suitable for the Advertising Industry:

DREAM WALL SERIES
